Calbayog City Samar | 09354872804 | Joshuapadilla706@gmail.com | [Linkedin](#) | [Github](#)

SUMMARY

Computer Science student with experience in mobile and backend development. Completed OJT at a Web3 startup, contributing features to a production React Native app using Expo. Built full-stack systems with Node.js, Express, and MongoDB. Comfortable working in startup environments and existing codebases.

WORK EXPERIENCE

[RAK SON OPC](#) - Mobile App Developer Intern (2025):

- Assisted in adding new features to a production mobile application.
- Worked using **React Native** and **Expo**.
- Implemented UI changes and feature updates based on requirements.
- Tested and debugged features within an existing codebase.
- Collaborated with developers in a startup environment.
- Gained exposure to Web3-focused product development.

SK SECRETARY (2023-PRESENT):

- Keep Minutes of Meetings.
- Maintain and Prepare SK official records.
- Assist in Planning and Coordinating youth programs.

CODING PROJECTS

Blockchain-Based Credential Verification System | [Certus](#) | - 2026

- Built a blockchain-based system that allows institutions to issue tamper-proof digital credentials that can be verified publicly.
- Developed smart contracts using Solidity to store credential hashes on blockchain.
- Built backend using NestJS and PostgreSQL.
- Implemented multi-signature approval logic.

Health Risk Prediction System | [BioMetric](#) | – 2026

- Developed a machine learning-based system that predicts health risk levels from user inputs.
- Built prediction model using Python.
- Developed backend API for prediction processing.
- Integrated frontend interface for user health input.
- Deployed system using VPS and Nginx.

HappyPaws - Veterinary Clinic App | 2025

- Built a full-stack mobile system that streamlines clinic operations and centralizes pet medical records.
- Designed REST API for pets, users, appointments, and medical history.
- Implemented JWT authentication and role-based access.
- Built React Native mobile application using Expo.
- Deployed backend using Vercel.
- Integrated a simple chatbot using OpenRouter API.

EDUCATION

- Northwest Samar State University (2022-2026)**
Bachelors of Science in Computer Science
- Institut Teknologi Sepuluh Nopember (ITS) - Indonesia (2024)**
Hybrid Asia Exploration (HAX) Program

SKILLS

- | | |
|--------------|--|
| LANGUAGES: | Python and JAVA (Fundamentals), Node.js (Intermediate), |
| FRAMEWORKS: | Express , React , React Native , Expo |
| TOOLS: | VSCODE , Git , Github |
| DATABASES: | NoSQL (MongoDB), PostgreSQL |
| SOFT SKILLS: | Adaptability , Critical thinking , Communication , Problem solving |
| OTHERS: | AWS EC2 and S3 , Socket.io |
